## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claim 70, drawn to a method of isolating a virus, classified in class 435, subclass
   239.
- II. Claims 72-78, drawn to a method of isolating a virus, classified in class 435, subclass 239.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to completely different methods of isolating a virus that do not include any overlapping method steps or ingredients. The method of group I involves a pH-heat extraction and the method of group II involves a method of extracting viruses with polyethyleneimine. The methods are not disclosed as capable of being used together and each method results in a different effect. The results of example 6, discussed on page 19 of the disclosure, indicates that the different methods extract different quantities of virus depending on the viral host and the species of plant. Therefore, each separate method is optimal for different plants and viral hosts.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. In addition, the search for each of the specific

Art Unit: 1648

method steps and the ingredients used in each of the methods is not overlapping and issues that may arise in examination of one group may differ.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shanon Foley whose telephone number is (703) 308-3983. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Housel can be reached on (703) 308-4027. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-4426 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
